DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Katsui et al (US Pat. 6, 067,227).

Regarding claims 1-3, Katsui discloses a heat dissipating device of a power supply; the power supply comprising a base 7 and a cover 8; wherein power is conducted into a receptacle at a back side of the base 7; a voltage of the power is reduced by an electric element and then is supplied to the computer; an upper end of the cover-8-is-formed-with-a-through-hole-the-size-of-which-is expanded-as-large-as----possible in the upper end of the cover 8; a fan 2 is installed in an interior of the through hole, the fan sucks outer cool air to blow the interior electronic element; the air is vented out from a plurality of ventilating holes at the backside of the base 7 wherein a mask 2a covers upon the through hole wherein the fan senses the temperature of the power supply and the rotation speed of the fan is adjustable (column 11, lines 55-60).
